Section 7 - Teaching, learning and assessment

Teaching, learning and assessment methods serve the course aims by recognising your expanding knowledge and command of correlated skills as you progress from stage one to stage three and both acknowledging and encouraging your increased intellectual independence. Consequently, at stages one and two the primary method of teaching is to combine lectures, which are used to map out a conceptual area and help orientate you in it, with small-group seminars where you are able to test your developing understanding through presentations and discussion and focussed learning tasks (précis, timed analysis, etc. These formative modes are supplemented with summative essays and examinations. From stage two onwards the emphasis on independent learning arising from your growing knowledge, and your desire to follow your interests is reflected in more specialised modules for which a formal distinction between lecture and seminar is no longer entirely appropriate. Here the shift in formative assessment is towards presentations of work-in-progress and one-to-one advice on essay planning at both the conceptual and structural level.

Contact hours come in various forms and may take the form of time spent with a member of staff in a lecture or seminar with other students. Contact hours may also be laboratory or, studio-based sessions, project supervision with a member of staff, or discussion through a virtual learning environment (VLE). These contact hours may be with a lecturer or teaching assistant, but they may also be with a technician, or specialist support staff.

The way in which each module on your degree course is assessed will also vary. Assessments designated as 'summative' will receive a mark which will count towards your overall mark for the module, and potentially your degree classification, depending on your year of study. On successful completion of the module you will gain the credits listed.

More detailed information on modules, including teaching and learning methods, and methods of assessment, can be found via the online [Module Catalogue](#). The accuracy of the information contained in this document is reviewed regularly by the university, and may also be checked routinely by external agencies.

Section 8 – Additional costs

Section 9 – Indicators of quality and standards	
QAA Framework for Higher Education Qualifications (FHEQ) Level	4-6
Your course is designed in accordance with the FHEQ to ensure your qualification is awarded on the basis of nationally established standards of achievement, for both outcomes and attainment. The qualification descriptors within the FHEQ set out the generic outcomes and attributes expected for the award of individual qualifications. The qualification descriptors contained in the FHEQ exemplify the outcomes and attributes expected of learning that results in the award of higher education qualifications. These outcomes represent the integration of various learning experiences resulting from designated and coherent courses of study.	
QAA Subject benchmark statement(s)	http://www.qaa.ac.uk/quality-code/subject-benchmark-statements
Subject benchmark statements provide a means for the academic community to describe the nature and characteristics of courses in a specific subject or subject area. They also represent general expectations about standards for the award of qualifications at a given level in terms of the attributes and capabilities that those possessing qualifications should have demonstrated.
